ISNetworld Approves AWS as 100% Compliant Specialty Contractor

We are pleased to announce that Advanced Waste Services, Inc. has become an active member of ISNetworld. ISN is the global resource for connecting corporations with safe, reliable contractors in capital-intensive industries. ISN collects self-reported conformance information from contractors/suppliers, verifies its accuracy, and then reports the results in an easy-to-follow format. This allows corporations to select those resources that best meet internal and governmental requirements, while providing contractors/suppliers the opportunity to centralize their conformance information, saving time and gaining presence in the marketplace.

Through ISN, we are able to complete the following functions:

- Comply with regulatory and Owner Client requirements
- Centralize all compliance information, contact information and marketing information
- Create searchable company profile (types of work/industry classifications, office locations, etc)
- Manage our company's safety and procurement information available to Owner Clients
 - Management System Questionnaire (MSQ)
 - Insurance
 - Contracts/Agreements
 - OSHA Forms
 - EMR Letters
 - Safety Programs
 - Supplier Diversity Certificates
- Receive email reminders prior to expiration of insurance and other compliance information
- Manage employee training, job history and performance evaluations

In addition, ISN's Review and Verification Services (RAVS) verifies and evaluates our health and safety information to ensure record keeping and minimum OSHA/regulatory requirements are met.

We are proud of our safety and compliance record and invite you to view our statistics compiled by ISN on the following page. As one of our valued clients, we encourage you to use ISNetworld to manage and evaluate all your contractors/suppliers. With an Owner-Client Subscriptions, you can have access to a directory of contractors/suppliers' information. You can find more information at www.isnetworld.com.

Thank you for your business and for your consideration in using this cost-effective technology.
